

MERDEKA 118 : ARCHITECTURE MARVEL AND REDEFINING THE SKYLINE

Executive Summary

This presentation introduces the recently completed architectural marvel in Kuala Lumpur: the Merdeka 118 Tower, a striking symbol of innovation and local pride. As the second tallest tower in the world, this landmark was designed by Fender Katsalidis (Australia) in collaboration with RSP Architects Sdn Bhd, as the Architect of Record.

The first section focuses on the architectural design, showcasing how innovative concepts and unique features beautifully reflect local culture and heritage.

The next section delves into sustainable fire safety design, highlighting a unique performance-based approach adopted for Malaysia's tallest tower. This includes the careful process of securing necessary approvals from statutory authorities while meeting all relevant building codes. Special provisions have also been integrated into the design to ensure the safe evacuation of occupants, prioritizing fire safety and life safety without compromise.

Overall, this presentation highlights the impressive achievements of the Merdeka 118 Tower, showcasing the best of modern architecture and engineering excellence.
